

Meridian Park K-2

Thursday, March 15th, 2018

6:00-7:30PM

Discover the fun of engineering through hands-on activities with your whole family!

Activities at this event will be geared towards Kindergarten – Second Grade Families. There will be an event later in the spring with activities designed for students in Grades 3-6.

COMPUTER SCIENCE

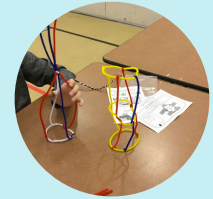

Problem-solve through computer coding at beginner, medium, and challenge levels

OPENER ACTIVITIES

Short, fun experiences with engineering

BIG BUILDS

More in-depth activities that introduce the Engineering Design Process

Hands-on activities.

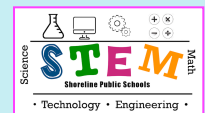

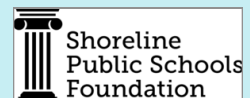

This promotes the engineering process, scientific thinking, and an opportunity to learn and play as a family.

Parents engage with activities alongside their children

This teamwork of families is necessary for success of the activities.

FEEDBACK FROM OTHER SHORELINE FAMILIES:

This was a truly terrific event that our student hasn't stopped talking about! ~ It was a great mix of subjects and ideas! ~ We loved it! Thank you so much for providing us with the opportunity to do some fun problem solving as a family!

Do it again! Do it more often!
